SUMMARY

Results-driven Software Development Engineer with over 5 years of hands-on experience in designing and delivering robust, end-to-end web solutions using modern technologies. Proficient across the full Software Development Life Cycle (SDLC), with a strong focus on building scalable, high-performance applications. Demonstrated expertise in gathering requirements, analyzing complex problems, and executing solutions with precision. Skilled in both back-end and front-end development, with solid programming experience in Java and Python. Known for delivering sophisticated and innovative solutions that meet business objectives effectively.

TECHNICAL SKILLS

Programming Languages: Front End: HTML5, CSS3, JavaScript | Back End: Java, Python

Frameworks & APIs: React, Bootstrap, Angular, Spring, Spring boot | JDBC, React Native, Kafka, Junit, Scala

Database Management and Big Data Systems: Oracle PL/SQL, MySQL, MongoDB, Snowflake SQL, Big Query, PostgreSQL.

Tools and Technologies: IBM RAD, Eclipse, IntelliJ, GIT & GitHub, GCP, JupyterNotebook, Visual Studio, Sage Maker, Jenkins

Testing Tools: Karate, Postman, Insomnia, ALM, Junit, JIRA, JAMA

WORK EXPERIENCE

Sr.Software Engineer, Deloitte

DEC 2024 – Present

- Developed and maintained scalable microservices using Spring Boot and Spring Cloud, applying MVC architecture and RESTful design principles. Built reusable backend components with Core Java (Collections, Generics) and ensured quality via JUnit and Karate-based testing integrated in CI/CD pipelines using Jenkins and Maven.
- Collaborated in Agile teams to deliver cloud-native solutions, actively participating in sprint planning, grooming, and daily stand-ups. Contributed to business logic optimization using combinational algorithms and implemented SOAP/REST APIs to support distributed system performance and resilience.
- Enabled seamless communication between services through Spring Cloud features like dependency injection and service discovery. Debugged and resolved distributed environment issues, coordinated with QA for end-to-end testing, and utilized Git/IntelliJ for streamlined development workflows.
- Led the automation of test data ecosystems and regression testing frameworks, enhancing QA efficiency and ensuring consistent functional coverage across all microservices during each release cycle.

Software Engineer, Creditsafe Technology

Apr 2018 – Nov 2021

- Designed and developed scalable microservices using Spring Boot and Angular to deliver real-time financial data services, collaborating with front-end teams for improved user experience and engagement.
- Built RESTful APIs and implemented event-driven architectures with Apache Kafka for secure data exchange and real-time streaming. Migrated legacy monoliths to microservices, enhancing modularity and maintainability.
- Deployed cloud-based solutions on AWS and GCP (EC2, S3, Lambda) to improve scalability and reduce infrastructure costs by 15%. Integrated Prometheus and Grafana for real-time monitoring and alerting.
- Led CI/CD efforts using Jenkins and Docker, coordinated Agile Scrum delivery, and improved performance via optimized MySQL/MongoDB queries reducing response times by 30% and deployment time by 50%.
- Implemented robust testing strategies using JUnit and Mockito, increasing test coverage and reducing production bugs through consistent unit and integration testing in Agile sprints.

EDUCATION

Southern Arkansas University, Magnolia

Jan 2022 - Sep 2023

Master of Science in computer science

Coursework: Algorithms, Machine Learning, Big Data, Data Mining, Computer Architecture.

GPA – 3.9

SRM University, Chennai

Oct 2013 - May 2017

Bachelor of Technology in information technology

Coursework: Object-Oriented Design, DBMS, Operating Systems, Cloud Computing, Data Structures

GPA – 3.5
